Warmup/Attendance: [Week 1: Friday 8/28/2026]

Full Name: SID:

- As you sit down in class, start working with the people around you to try to solve these problems
- These are *not* graded for correctness, but you will turn this sheet in for attendance at the end of class.
- We'll discuss the solutions in lecture today.

## What type of variable is "age"?

Classify the recorded variable as **continuous numerical**, **discrete numerical**, **nominal categorical**, or **ordinal categorical**.

**1.** Age ranges of television audiences/demographics

**2.** Ages of UC Berkeley students

**3.** The age of a lightbulb (time until it stops working)

## Basic coding

Make your best educated guess about what the following blocks of code will do when run.

**4.** What will happen if you run this code?

```
1 + "one"
```

**5.** What will happen if you run this code?

```
a <- c(1, 2, 3, 4)
sqrt(log(a))
```

**6.** What will happen if you run this code?

```
a <- 1 + 2
a + 1
```

**7.** What will happen if you run this code?

```
a <- c(1, 3.14, "seven")
class(a)
```
