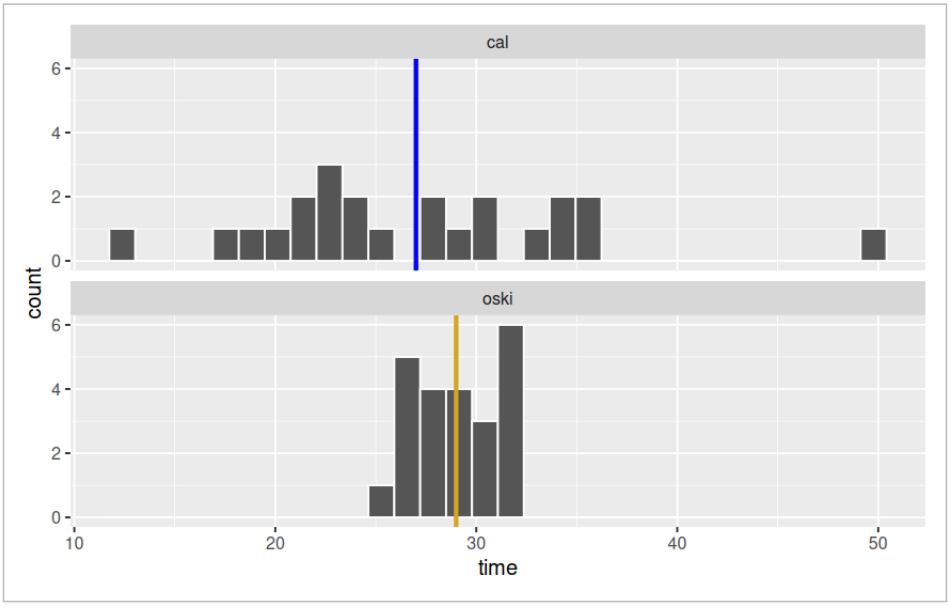
Warmup/Attendance: [Week 2: Friday 9/4/2026]

Full Name: SID:

- As you sit down in class, start working with the people around you to try to solve these problems
- These are *not* graded for correctness, but you will turn this sheet in for attendance at the end of class.
- We'll discuss the solutions in lecture today.

1. Why are measures of spread so important? Consider the following question.

There are two new food delivery services that open in Berkeley: Oski Eats and Cal Cravings. A friend of yours that took Stat 20 collected data on each and noted that Oski Eats has a mean delivery time of 29 minutes and Cal Cravings a mean delivery time of 27 minutes. However, one is more predictable than the other....



So: which would would you rather order from, and why? Debate with your group.
